

# Wear protection 2.0

## Solutions and products

Spare and wear parts  
made of different  
materials

For sand and gravel  
pits and stone quarries

# Quality standard & experiences

## Chilled cast iron

In different alloys for mixer linings, mixing tools, shafts etc.

How do you call wear parts, which last nearly forever?

Because of decades of experiences in using five different types of wear-resistant materials steel, chilled cast iron, rubber, plastic materials, especially polyurethane, and ceramics, we are able to adjust our products according to the special cases of use and requirements. We offer and deliver solutions not only products.

In this brochure you will find these wear resistant materials and their usual types of application.

If you got any questions, don't hesitate to ask us about possibilities of wear-reduction  
**+49 (0)511 48 30 28/29.**

Decades of experiences are the groundwork of highly wear resistant products!

## RWE PU

Highly wear resistant Polyurethane moulded parts. Sheets with our without steel inlays.

## RWE VM

Highly wear-resistant steel for heavy duty applications

## Your advantages

- Decades of experiences
- High quality
- Wide range of materials
- Short delivery time
- Nearly all parts are available from stock
- Own product development

For sand and  
gravel pits and  
quarries

# Quality & competence

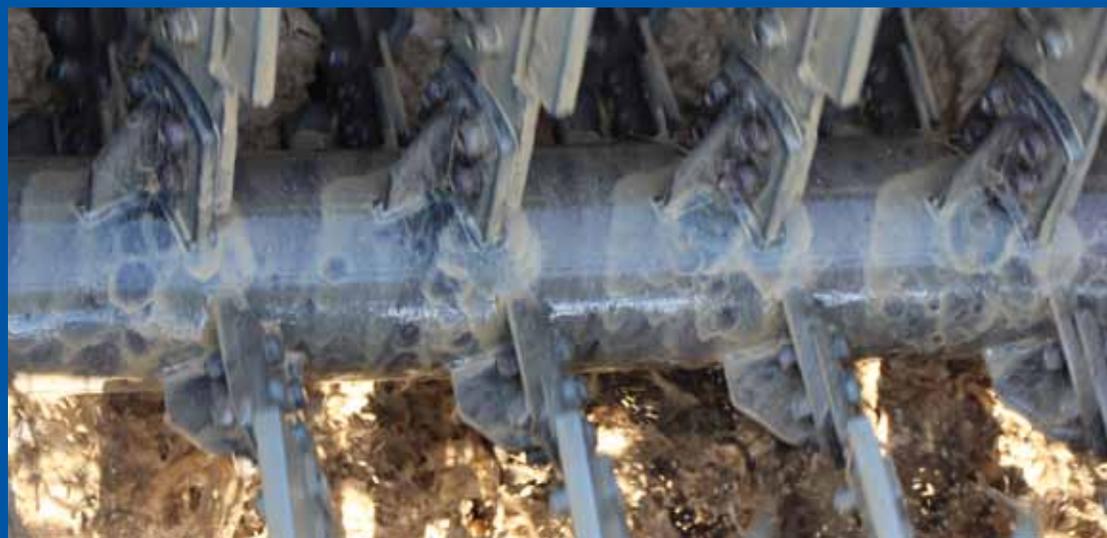

## Log washers

- For all brands
- Made of hardened steel RWE VM
- Made of chilled cast iron RWE G 680 or as a combination of steel and chilled cast iron
- Significant extend of life time using RWEV log-washer shafts

## Proven:

- Approved RWE G 760 material with again improved durability
- Please ask for references

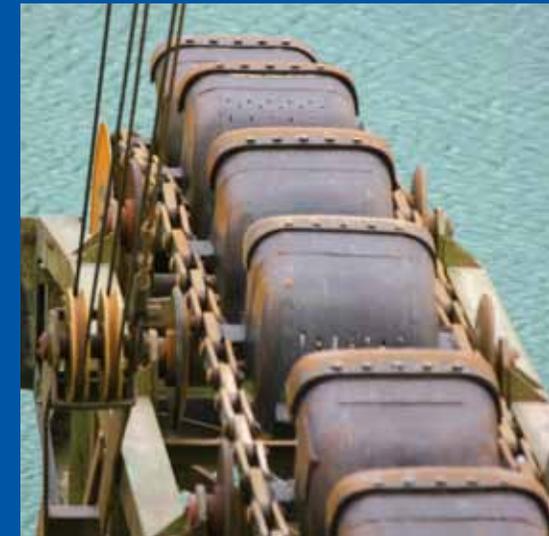

## fairschleißtechnik means:

- Products are made in EU
- Fair payment of manufacturer
- Fair payment of employees
- High standard of job safety
- High standard of environmental safety
- High standard of documentation
- Constant product quality
- Nearness user-producer
- Security of supply

## Bucket chain dredger

- Dredger buckets new and regenerated
- Chain links
- Bushes and bolts
- Chains

For sand and  
gravel pits and  
quarries

# Quality & competence

## Mosaic Mix

- Wear resistant plates made of different materials
- Chilled cast iron, Rubber, polyurethane and ceramics
- Screwable and combinable in any order
- For chutes and channels
- With bubbles for extra long lifetime

## Jigging machines

- Rotary feeders
- New and regenerated
- Star feeders made of polyurethane
- Equipment: shafts, gaskets etc.

## Spare parts for sand and gravel processing machines

- All spare parts for log washers, screws and sand classifier tanks

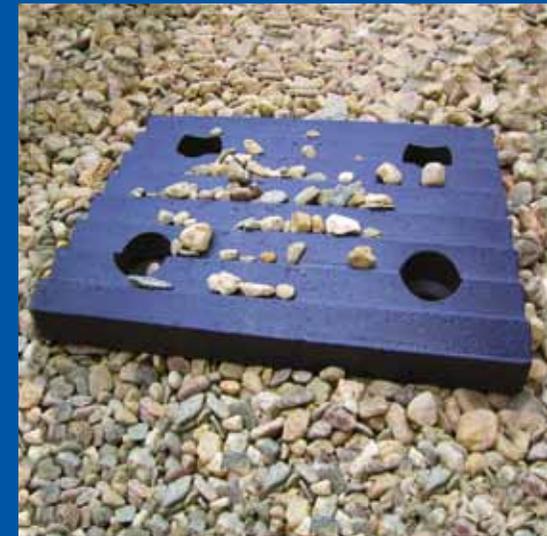

## Screens

- Made of polyurethane, rubber or spring steel
- Perforated steel plates
- Plug-systems, tensioned screen panels, flat screen panels

## Crushers

- For almost all brands
- Blow bars
- Crusher jaws
- Made of chrome alloys
- Made of manganese steel
- Linings made of chilled cast iron or highly wear-resisting steel plates
